

Como instalar o VS Code e o Python no Windows

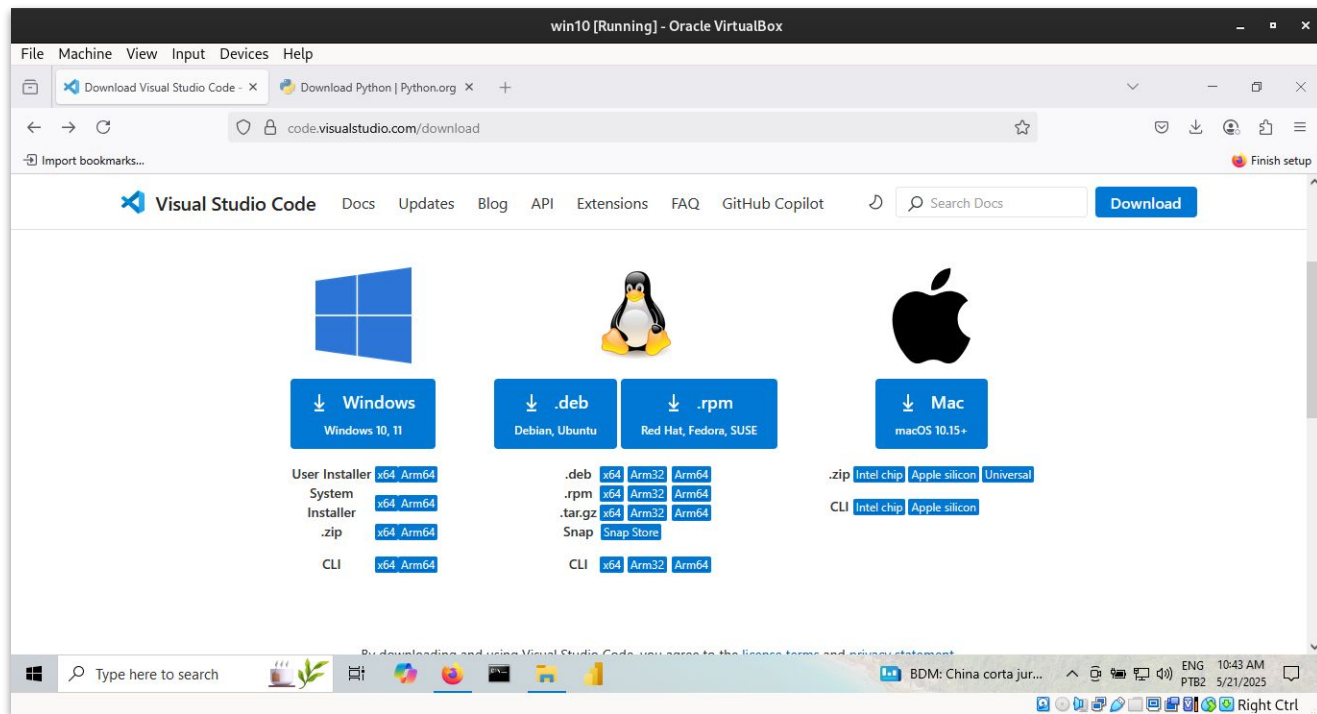

Programação em Python, v0.1

Prof. Eduardo Vasconcelos @ SENAI Araraquara
Araraquara, 21/05/2025

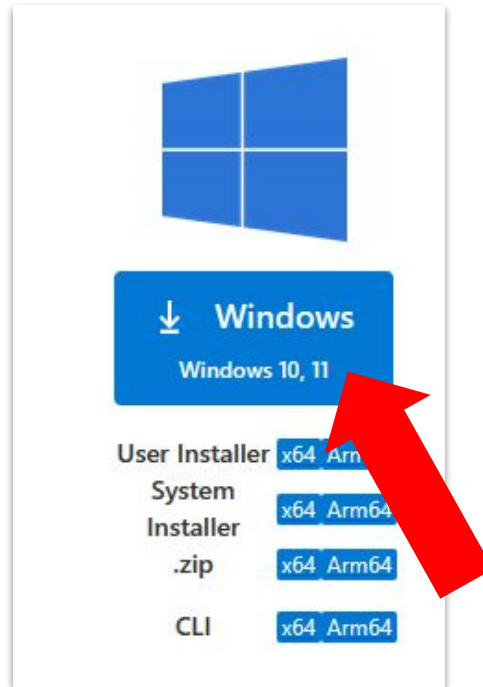

VS Code

Vá até o endereço

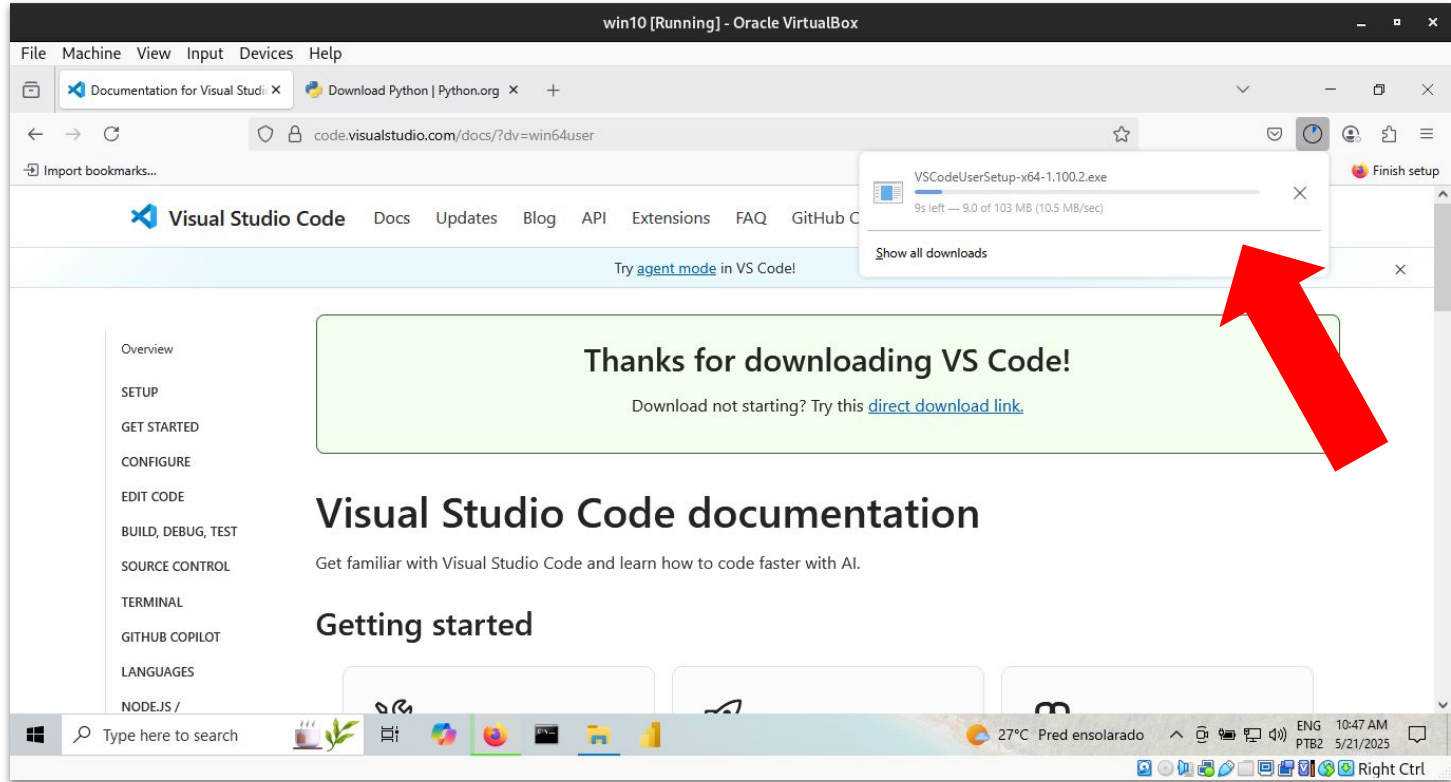

<https://code.visualstudio.com/download>

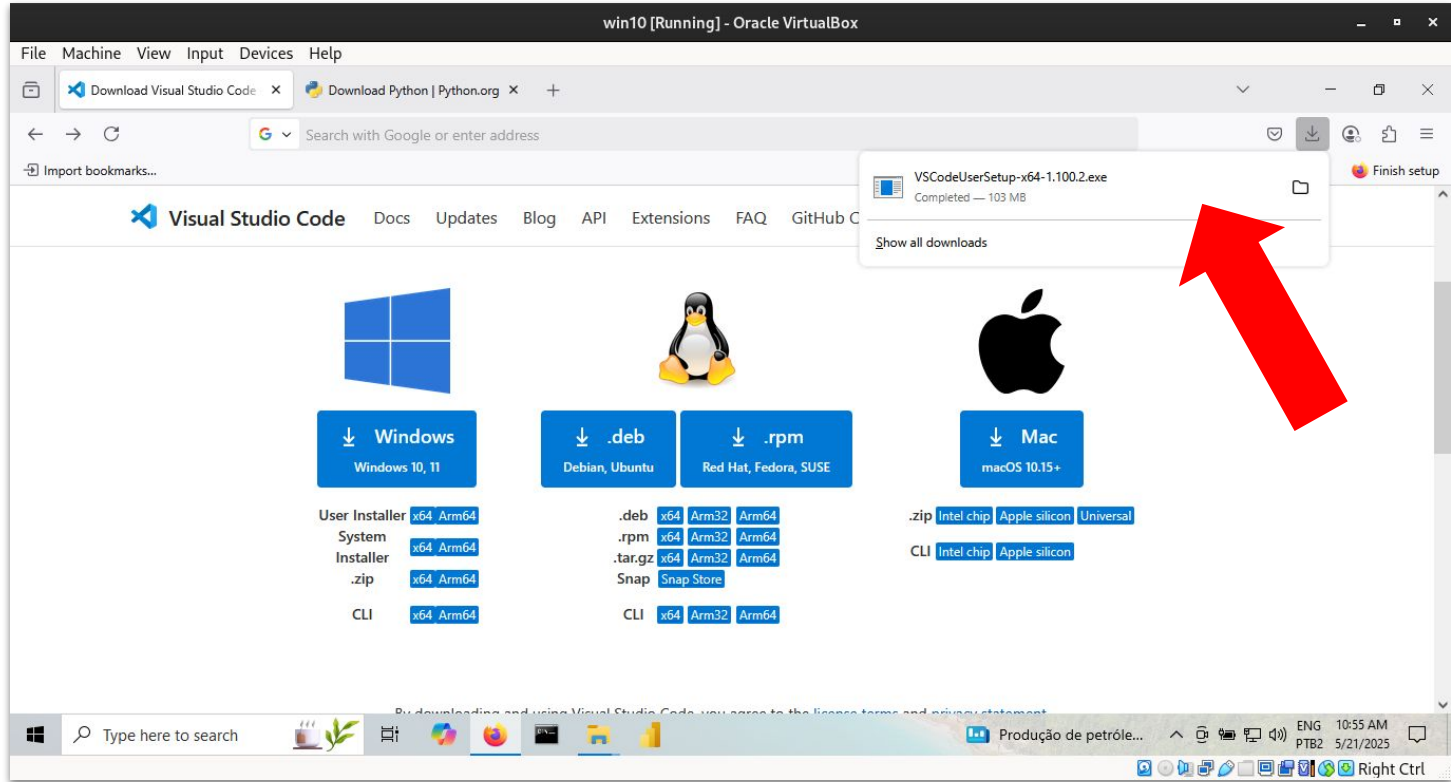

Baixe a versão do VS Code para “Windows 10, 11”

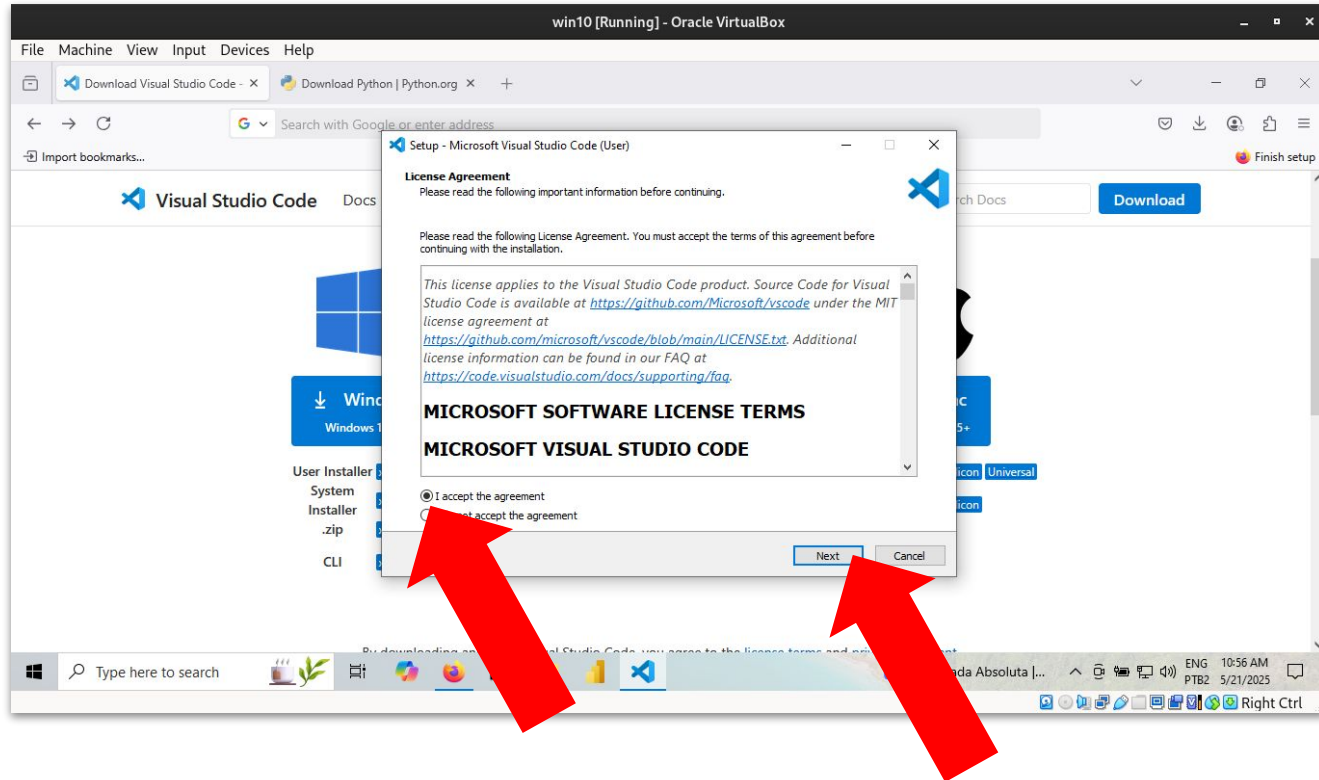

Aguarde a finalização do download

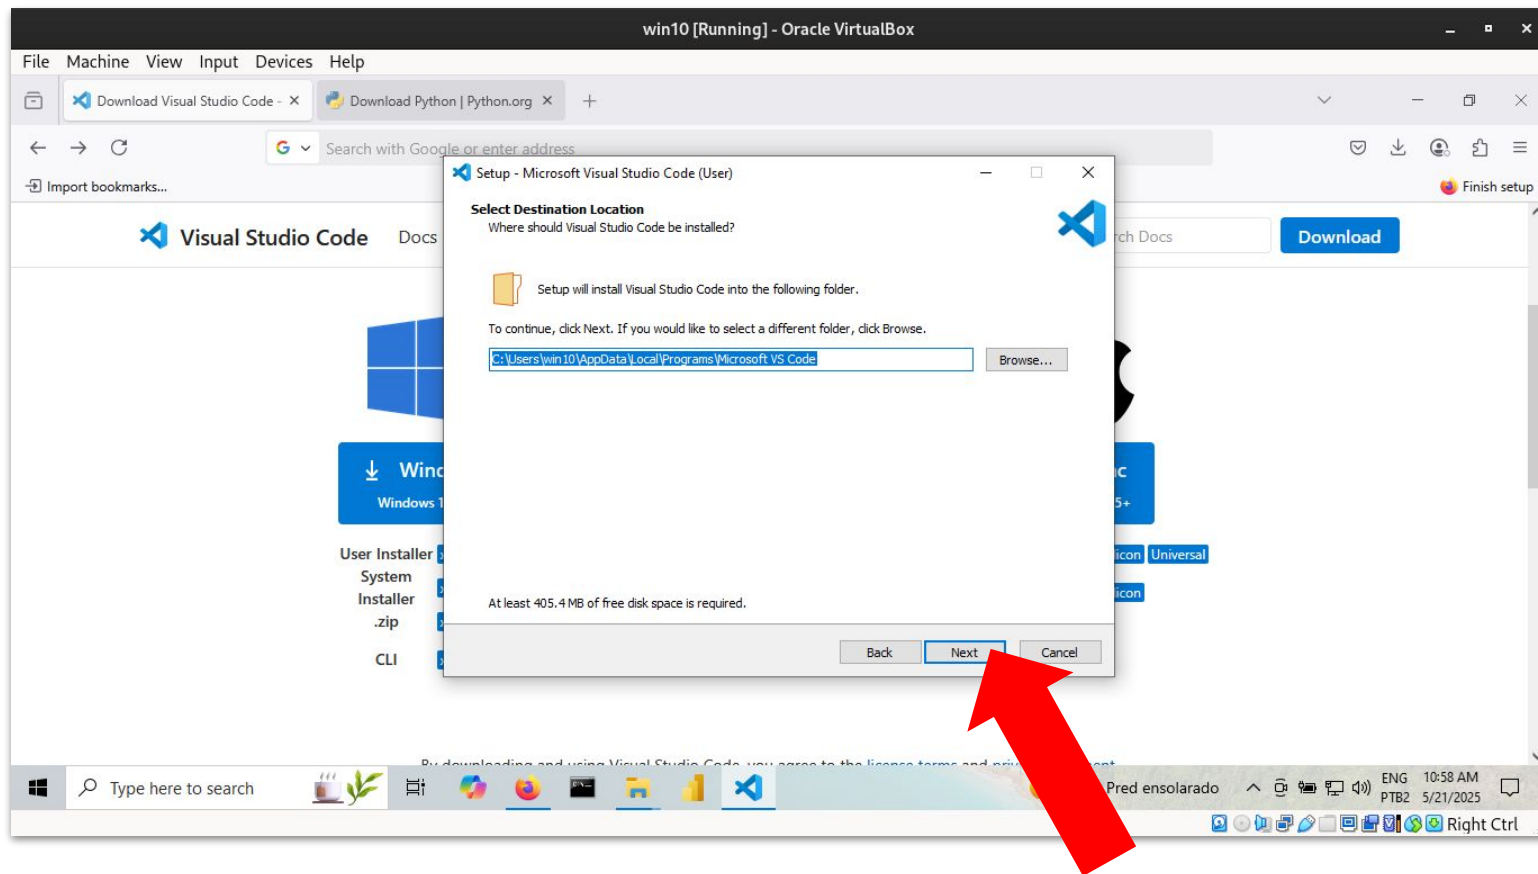

Clique no arquivo para iniciar o instalador

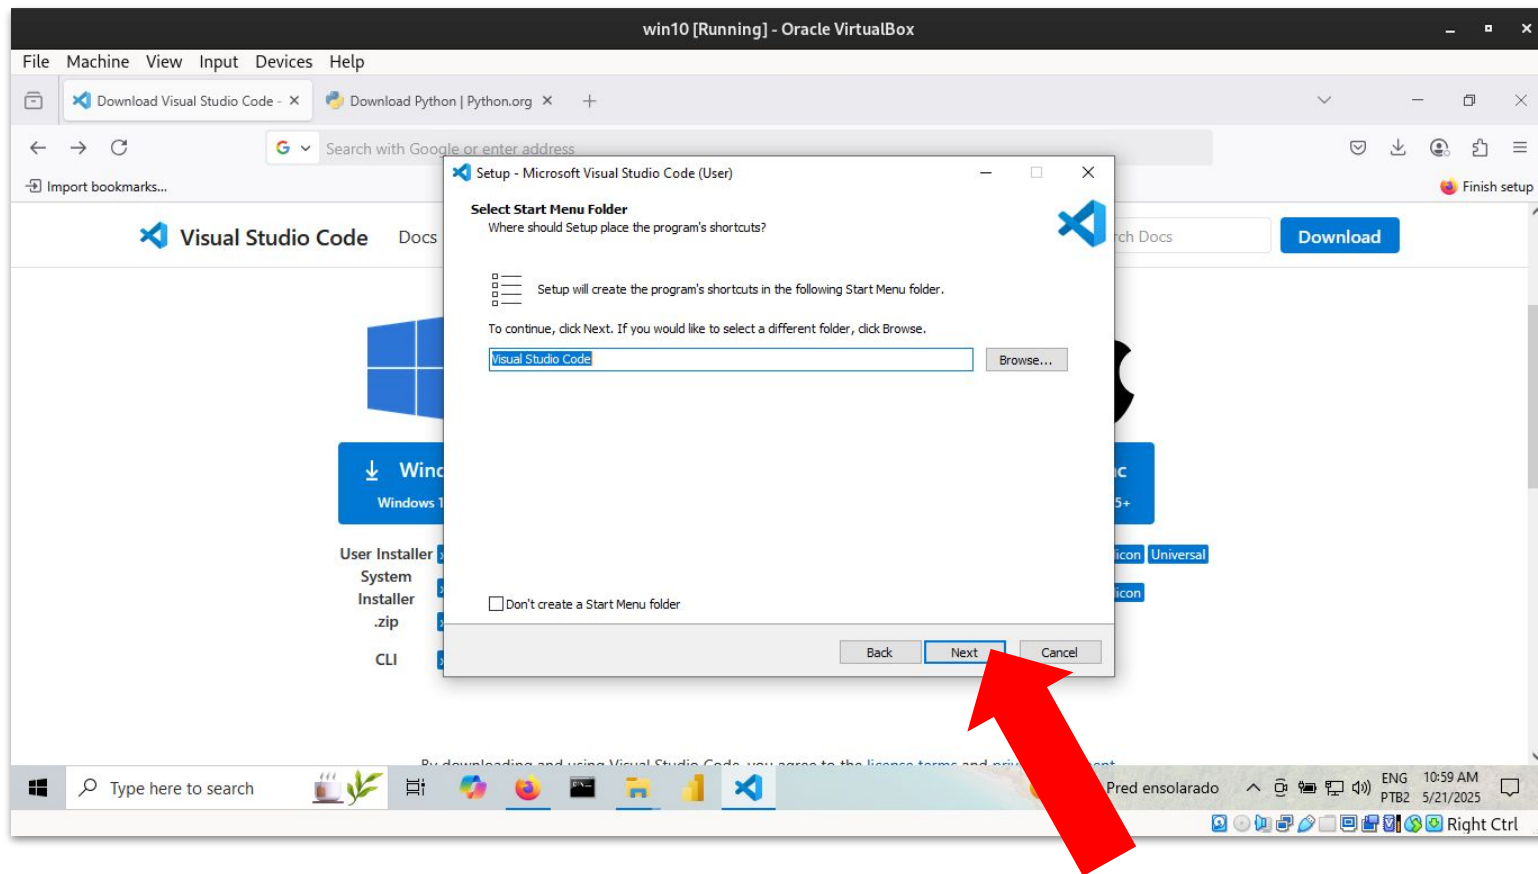

Revise os termos de uso. Se aceitá-los, clique em “I accept the agreement” e clique em “Next”

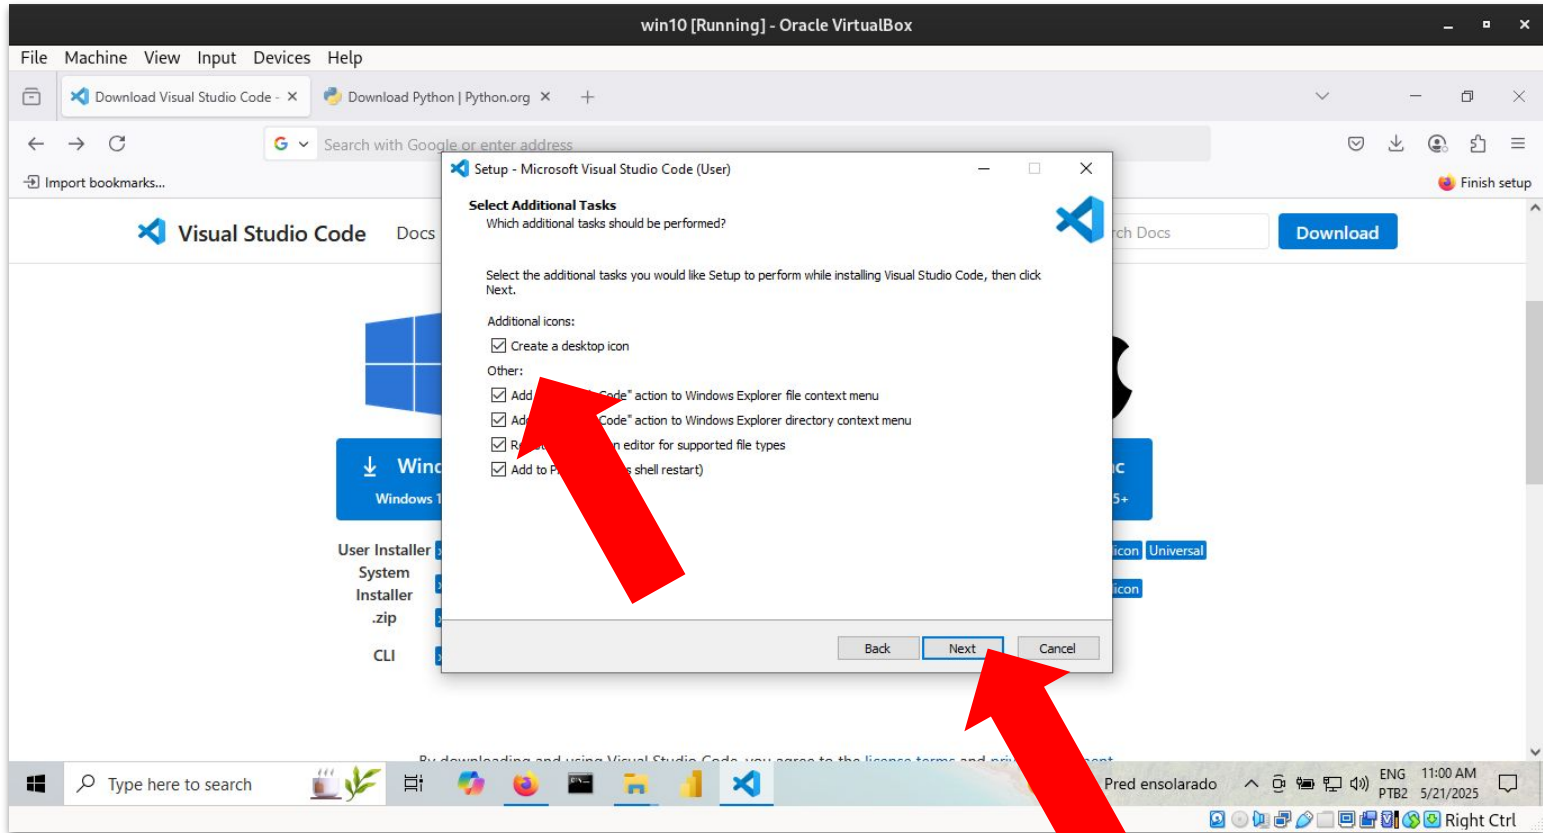

Clique em “Next” novamente

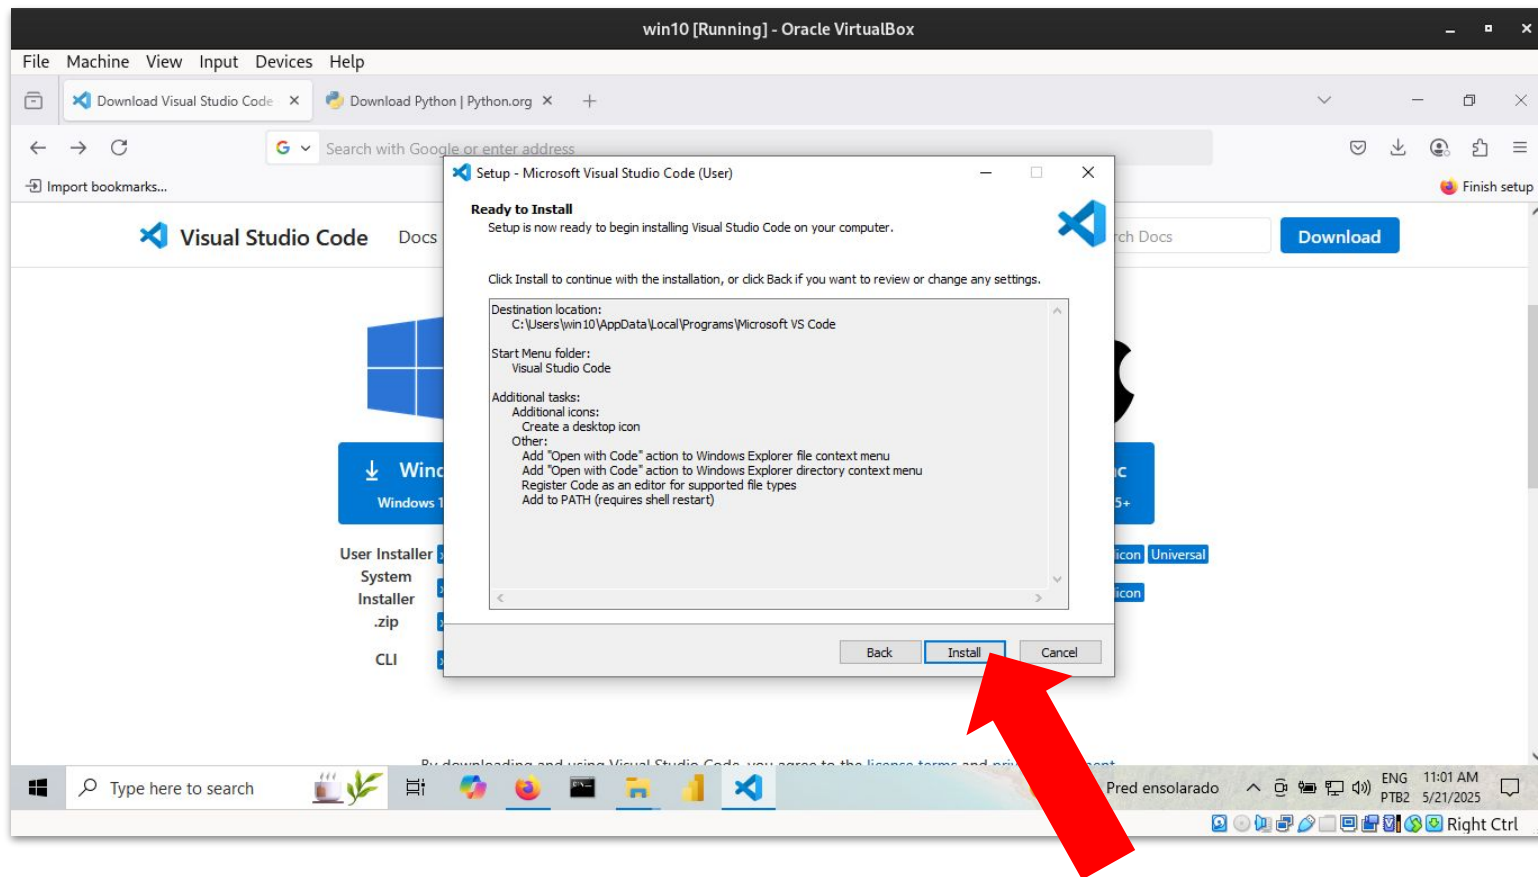

Clique em “Next” novamente

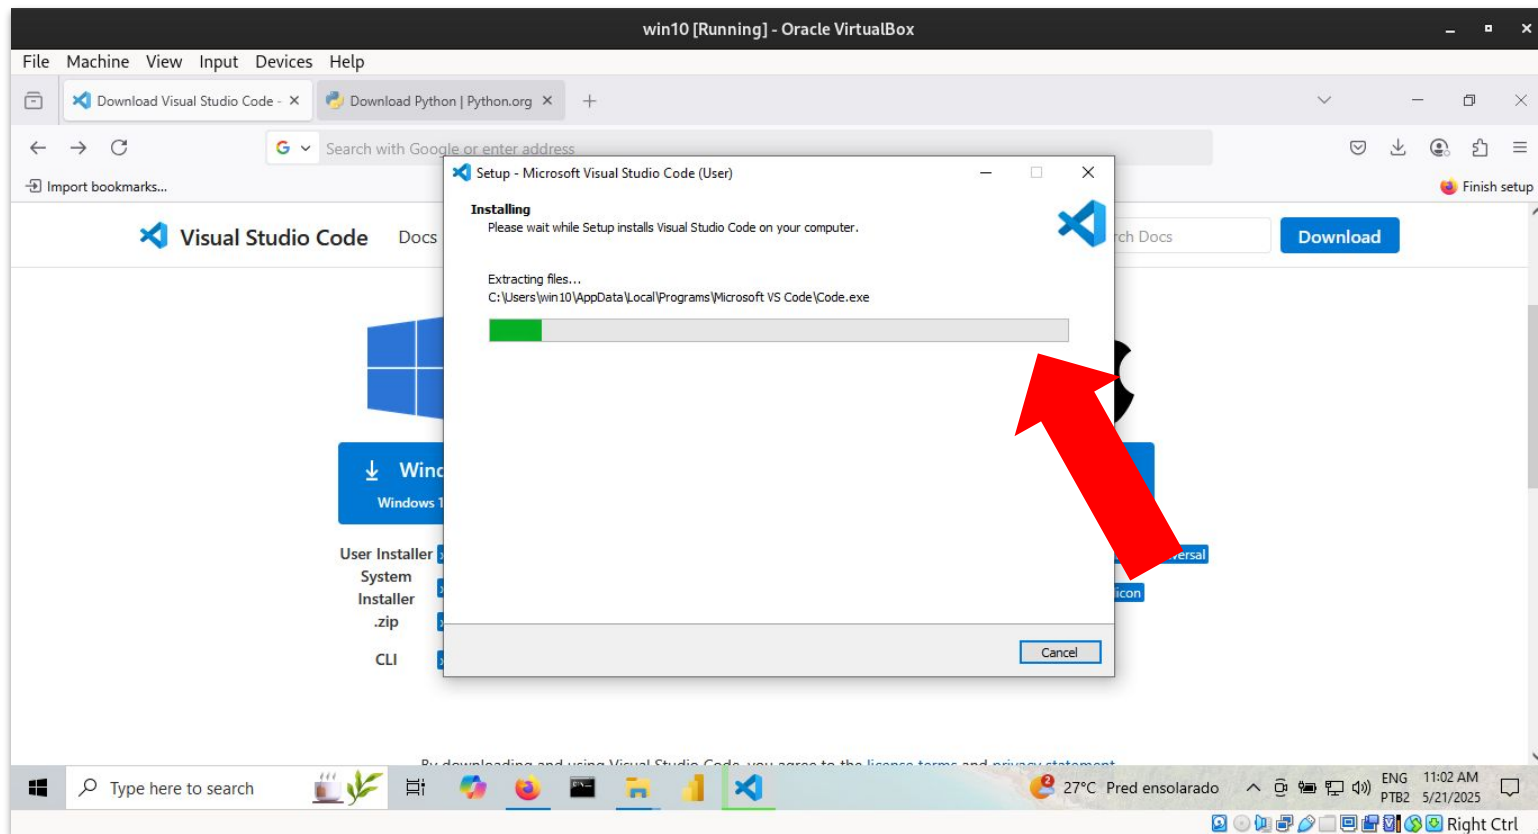

Marque todas as opções  e clique em “Next”

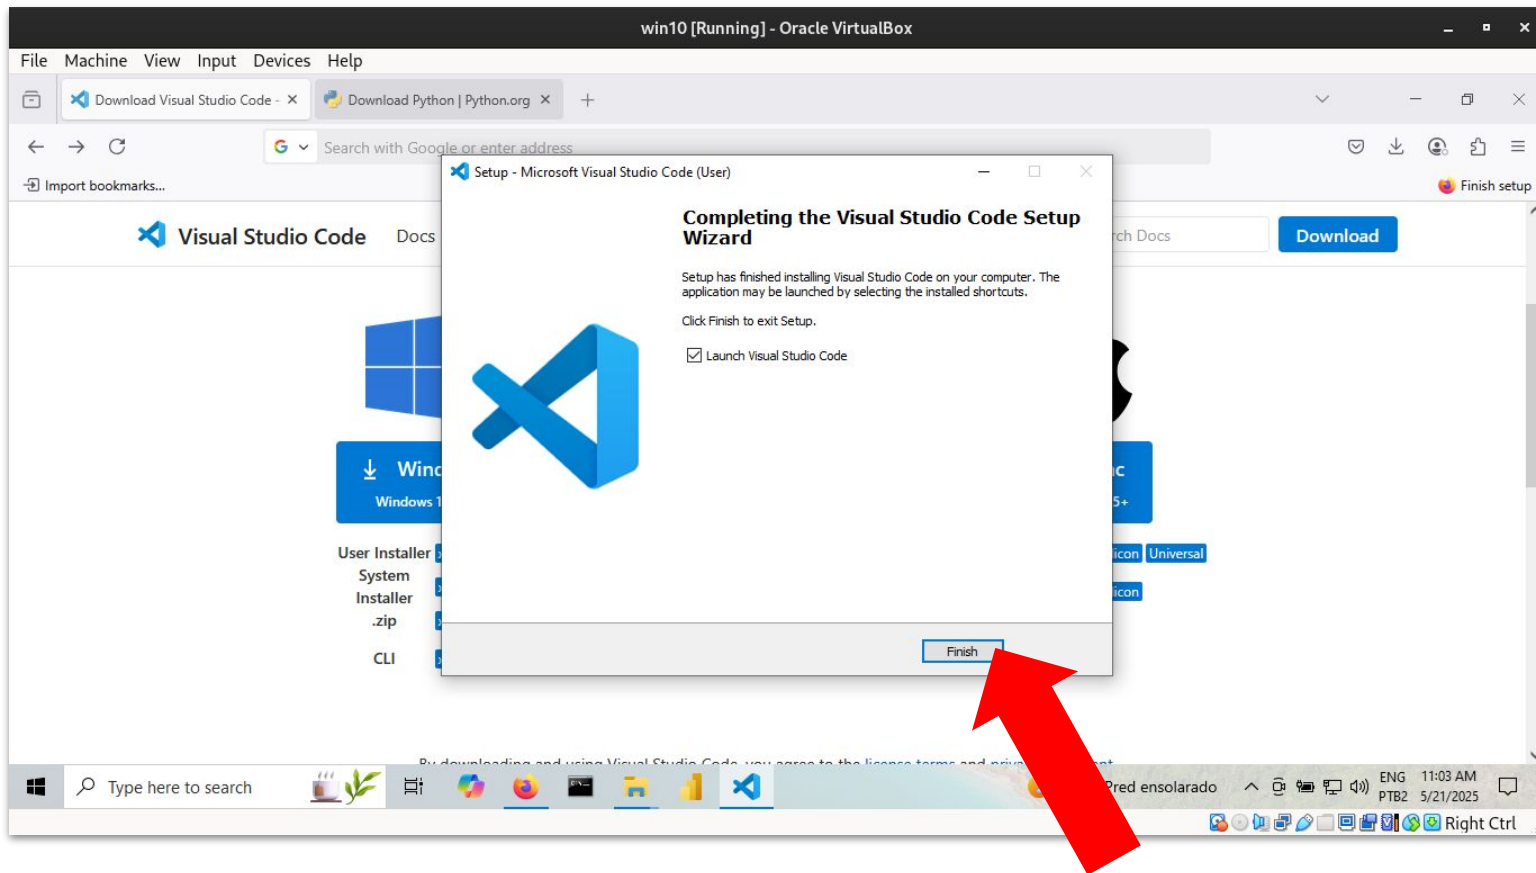

Clique em “Install”

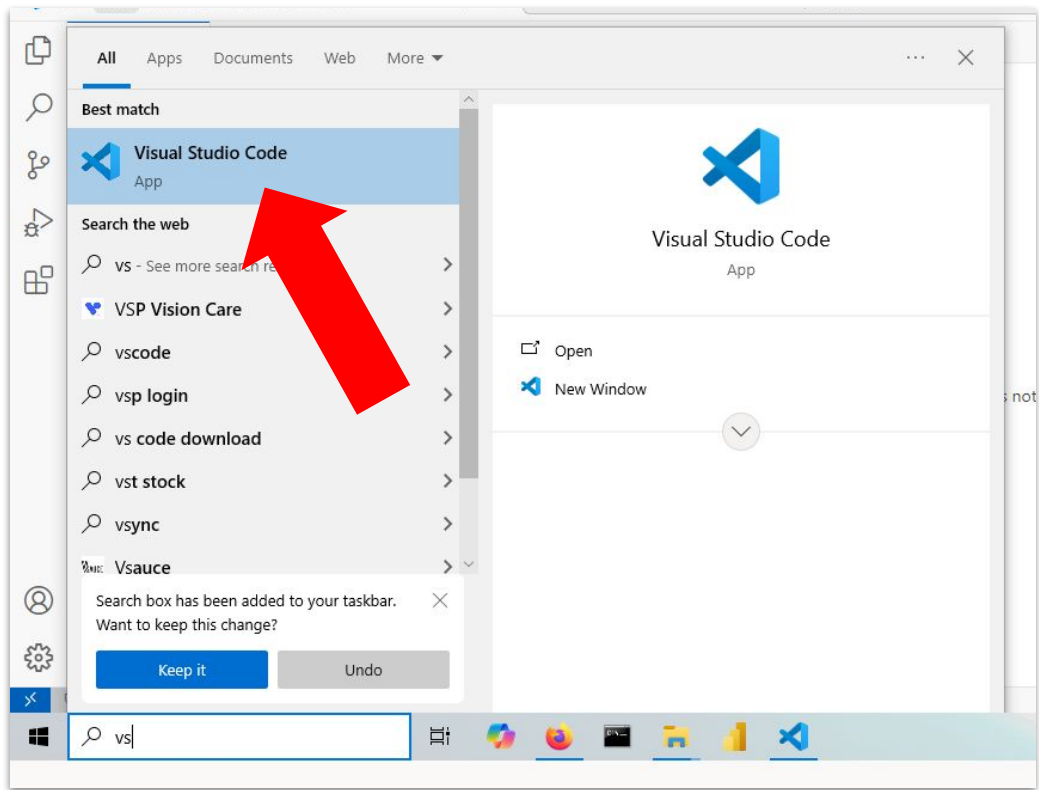

Aguarde a finalização da instalação

Clique em “Finish”

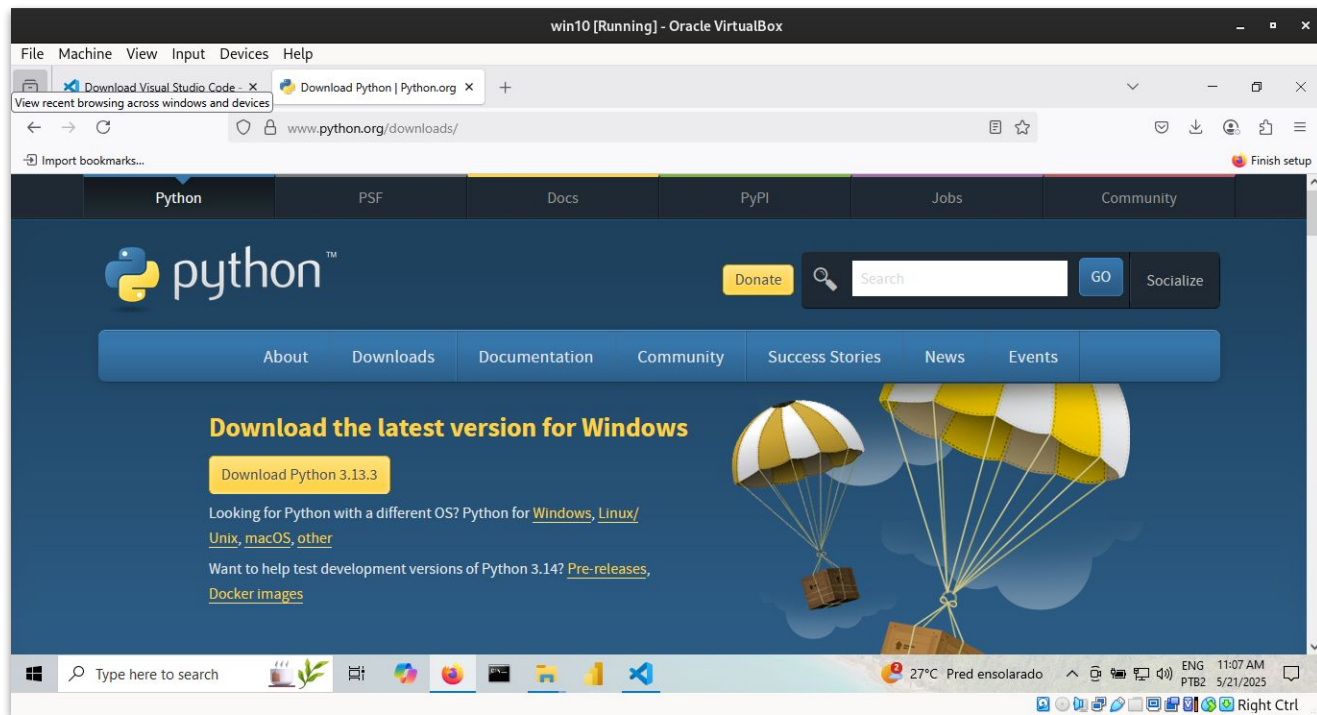

O VS Code está instalado na sua máquina e você pode encontrá-lo através do menu Iniciar

Python

Vá até o endereço

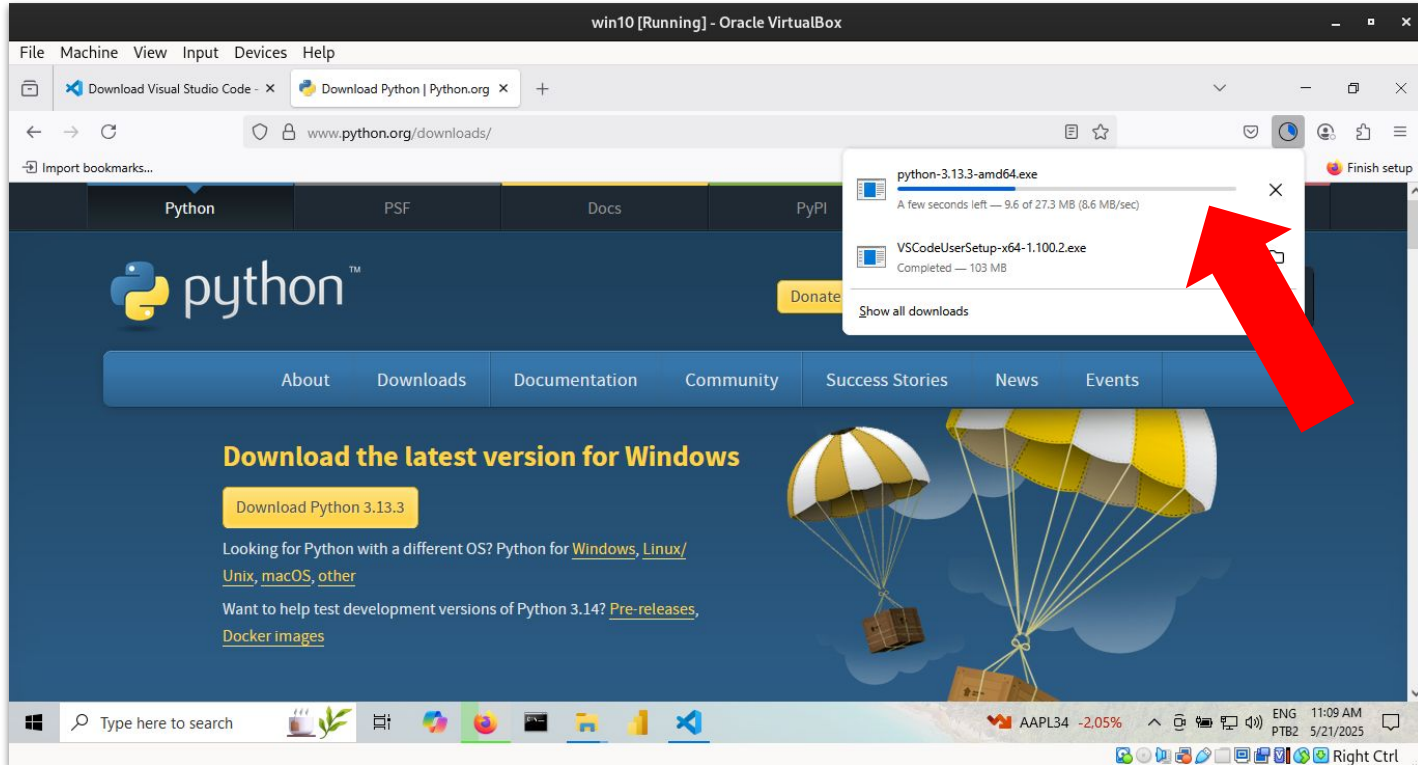

<https://www.python.org/downloads/>

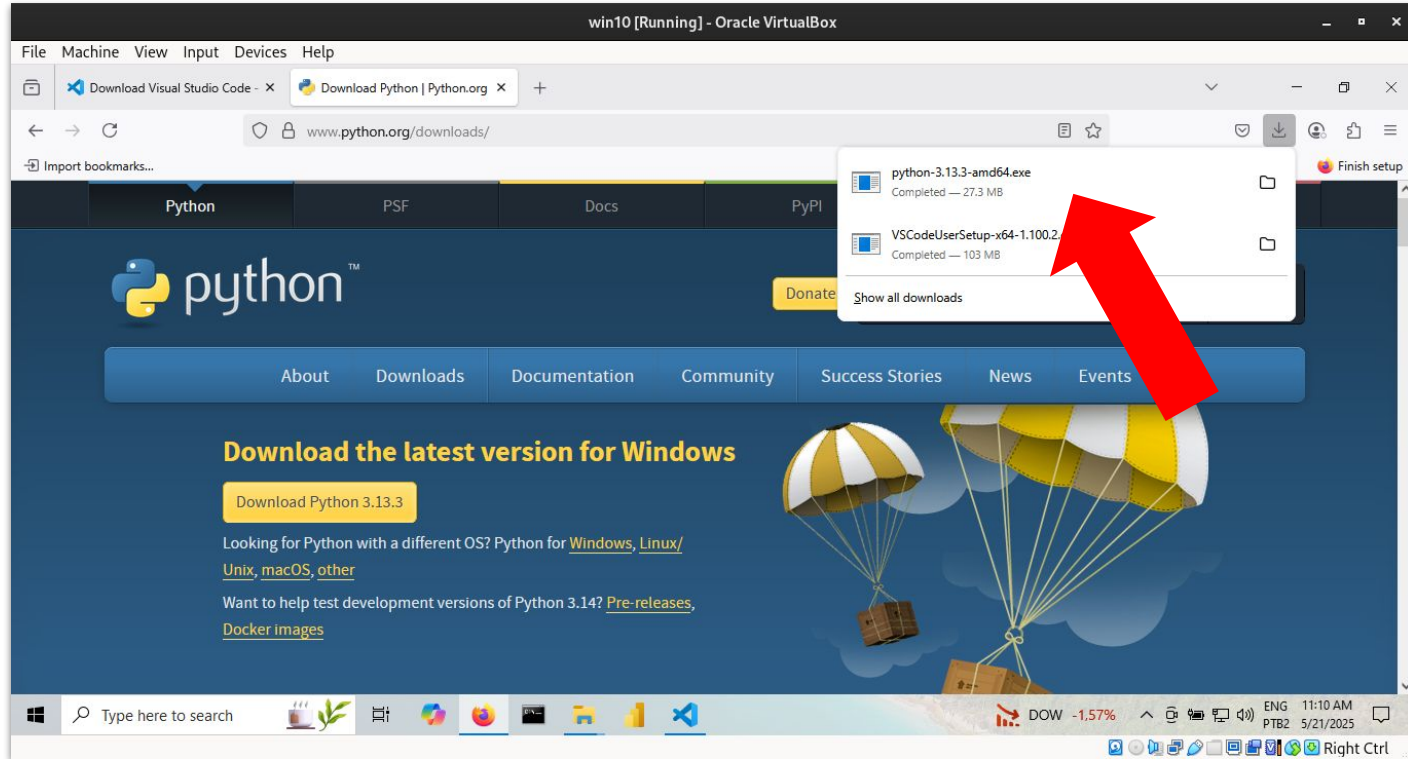

Baixe a versão mais atual do Python para Windows

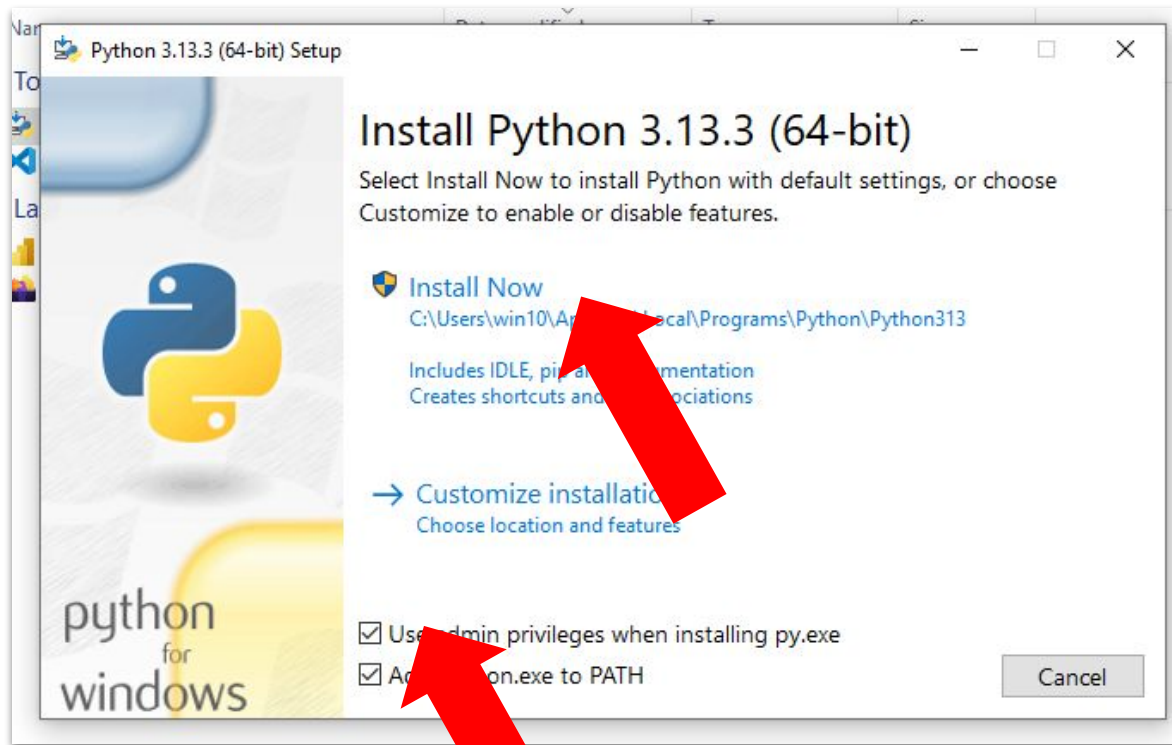

Aguarde a finalização do download

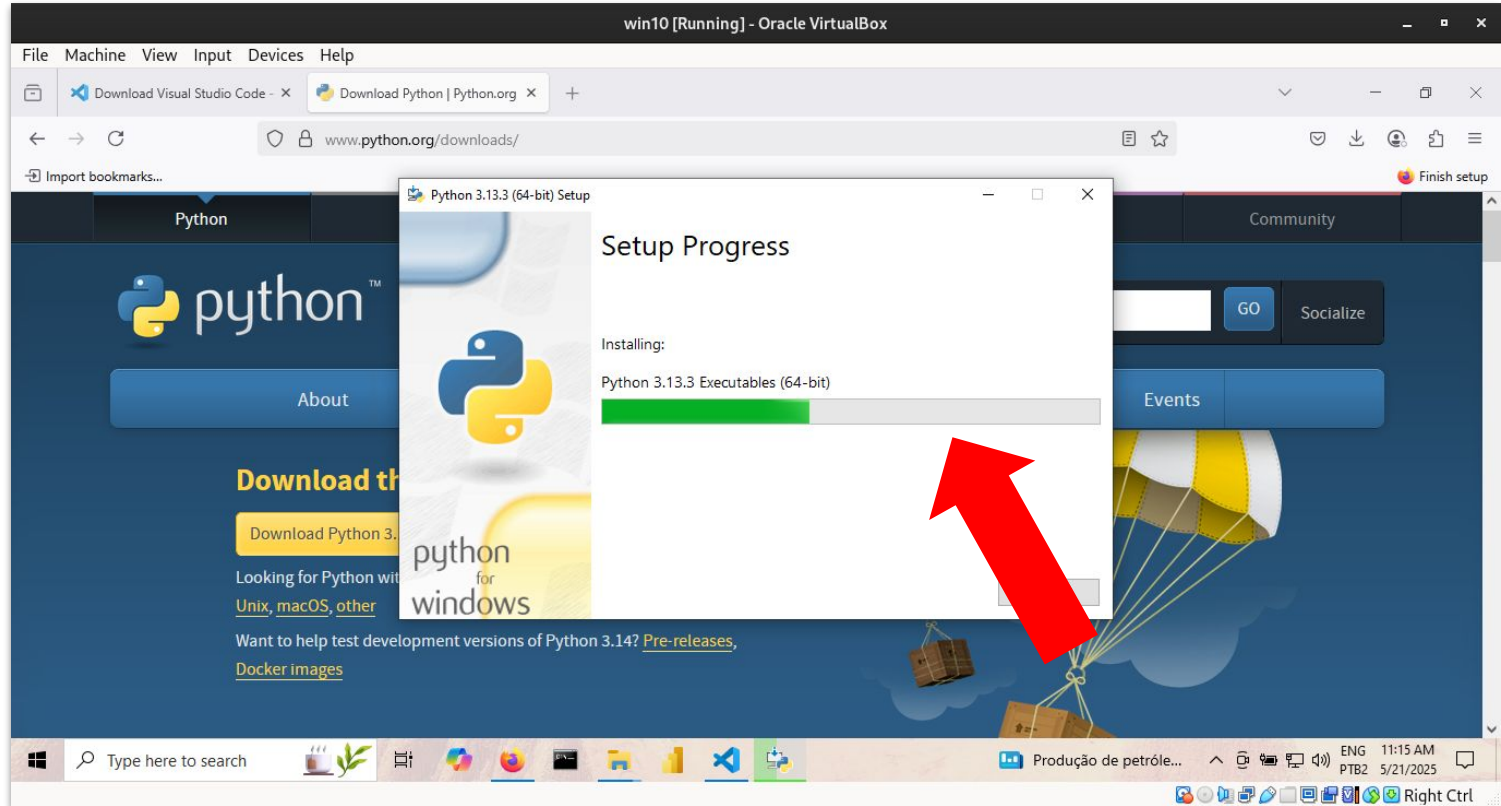

Clique no arquivo para iniciar o instalador

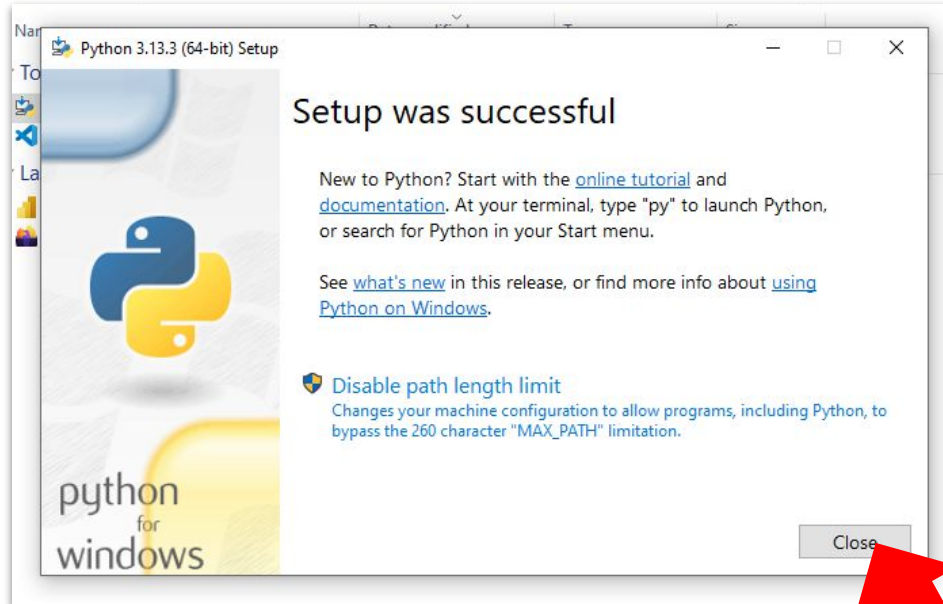

Marque as opções  e clique em “Install Now”

Aguarde a finalização da instalação

Clique em “Close”

O Python está instalado na sua máquina e você pode usá-lo através do CMD ou do VS Code (pode ser preciso fechar e abrir o VS Code)
